Floor towards attic (uninhabitable) - ddrtxn01b-05

floor towards attic (uninhabitable), timber frame construction, not suspended, dry, other surface

Performance ratin	g		
Fire protection performance	REI	60	
maximum span = 5 m; m Classified by HFA	aximum load E _{d,fi} = 3,	66 kN∕m²	
Thermal performance	U Diffusion	0.20 W∕(m ² K) suitable	
Calculated by HFA			
Acoustic performance	R _w (C;C _{tr}) L _{n,w} (C _l)	48(-4;-9) dB	
Assessed by TGM			
Mass per unit area	m	69.40 kg∕m ²	_ /
Calculation based on GF			L
			Ν

dataholz.eu – Catalogue of timber building materials, components and component connections reviewed to consider thermal, acoustic, fire performance requirements and ecological drivers for timber construction released by accredited testing institutes. These datasheets will generally be accepted as proofs of compliance by building authorities.
